ELECTRIC

WELDING

HIPPO Multipower CPS (Complete Power Solution) 2032E/2042E

ANSWERING THE CALL OF DUTY

The HIPPO CPS is a self-contained unit that maximizes power and productivity on the job while minimizing cost of operations and equipment, making it a fiscally and environmentally responsible power solution. It allows you to access those hard-to-reach jobsites quicker and with less hassle, and it helps you to maintain a smaller footprint while you're there.

The HIPPO CPS is constructed using only the most durable materials. Built to perform in the most demanding environments—on and off the battlefield—the HIPPO CPS was designed on the same military-grade platform that passed the Aberdeen Proving Ground tests.

MODEL	ENGINE	HYDRAULIC	AIR	ELECTRIC	WELDING	SIMULTANEOUS TOOL CIRCUITS	HOSE REELS
CPS 2032E	30 HP diesel	(2) 10 gpm @ 2,000 psi adjustable flow	40/80 cfm @ 110 psi	5.2 kVA 120 vac	N/A	any two	optional, hydraulic and/or air
CPS 2042E	30 HP diesel	(2) 10 gpm @ 2,000 psi adjustable flow	40/80 cfm @ 110 psi	5.2 kVA 120 vac	240 amp DC	any two	optional, hydraulic and/or air
